Mary:

How about Wednesday? I'm free most of the afternoon. Say, 2:pm ET?

Subject: [EXTERNAL] A time to discuss heat load

Eli –

We have been looking at the heat load issue and are concerned that the averaging may not be sufficient. Would you have some time later today or next week to discuss some alternative approaches. We understand that it may require some concessions on our part but we are very concerned that, after looking hard at our numbers, the 50 tpy number is not a sustainable number for the operations.

Regards,

Mary
